Sendero Cloud Solutions

As IT becomes more and more strategic and critical in impacting an organization's bottom line, companies look to the Cloud to decrease IT complexity and drive ROI. For some organizations, Cloud solutions can be more secure, predictable and scalable than on-premise solutions.

More Choice with Sendero Cloud:

Sendero Cloud provides organizations with over 40 Cloud solution options. We've vetted the top suppliers for each technology, and we understand their strengths and weaknesses in each category. We've also assessed the optimal suppliers for your specific vertical.

Experience with the Following Verticals:

Automotive, Financial, Hospitality, Real Estate, SMB, Logistics, Enterprise, Retail, Healthcare, Insurance, Government, Education, Software

Disaster Recovery and Business Continuity:

Hackers, cyber-terrorists, natural disasters and manmade disasters are no match for the Cloud. Consolidate your hardware infrastructure or become completely hardware independent with a virtual disaster recovery and business continuity solution. With the right partner, you can centralize your recovery plan in a seamless, secure redundant environment at a fraction of the cost of tradition disaster recovery on-premise solutions.

Unified Communications (UC) and Collaboration:

Allow on-site and remote users to collaborate seamlessly between devices and platforms with Unified Communications. VoIP, mobility, video-conferencing, instant messaging, bring-your-own device (BYOD), collaboration, and presence technologies can all work together seamlessly in the cloud…with the right solution and implementation.

Infrastructure as a Service (IaaS):

Reduce IT complexity, obsolescence, and costs by moving your IT infrastructure to a virtual environment. Virtualizing your colocation, disaster recovery, and storage infrastructure in public, private or hybrid Clouds can make organizations more manageable, secure, and scalable at a much lower cost.

Desktop as a Service (DaaS):

Embrace a mobile workstyle by utilizing the Cloud to access business applications and desktops on any device and in any location. DaaS eliminates the need for software maintenance and makes purchasing and managing workstations simple and fast. No need to manage servers or hardware, and obsolescence becomes a thing of the past in the right Daas ecosystem.

IT as a Service (ITaaS)

Focus your time and budget on IT strategy by migrating your more tactical IT responsibilities to the Cloud. ITaaS means your helpdesk, security, software updates, mobile device management, monitoring and

management can all be managed by trained specialists in the Cloud. ITaaS reduces capex, puts transparency around your financials and ensures predictability around cash flow.

Next Steps

Sendero Cloud helps organizations strategize, source and implement custom Cloud solutions for organization in more than a dozen verticals. From our portfolio of 40+ approved Cloud suppliers, we'll help you determine the right public, private or hybrid Cloud solution for your needs.
